MOVEMENT SOLUTIONS

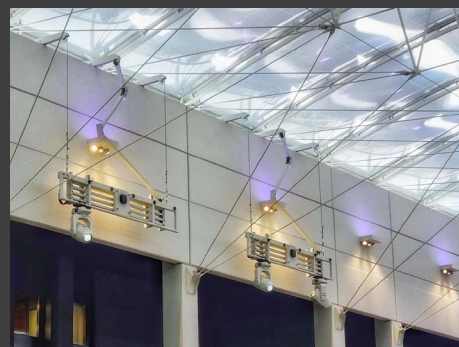

## STAGE ENGINEERING BOLZANO TRADE FAIR (BZ)

### PROJECT DETAILS

A custom solution was designed and implemented for the HI event hall at the Bozen Trade Fair. The system consists of 8 high-performance hoists that can be moved laterally on the walls, each with a load capacity of up to 1.5 tons. The hoists can be driven individually, but also synchronously. This allows the installation of 4-point trusses between the hoists, which can carry a load of up to 3 tons and thus be used as a stage hoist. When not in use, the trusses are dismantled and the hoists can be driven individually.

### SCOPE OF DELIVERY

- Mechanical high-performance hoists with encoder and load measurement with a lifting capacity of up to 1.5 tons
- Truss system for stage equipment
- Touch panel control
- Cable scissors system
