

The new ŠKODA Octavia.
A Class of its own.

STAGE ENGINEERING SKODA AUTO MUZEUM (CZ)

PROJECT DETAILS

Design, delivery, and installation of a complete fixed stage system consisting of two stage platforms. The first stage platform is used to present new cars and has an integrated revolving stage, as well as storage space for various stage utensils. The second platform is used to lower a telescopic stand and is equipped with an automated lid.

SCOPE OF DELIVERY

- Stage platform with Serapid drive and integrated revolving stage
- Mechanical stage platform for telescopic stand
- Automated lid for stage platform
- Stage touch control system
